For Distribution and Use Only in the State of Idaho

To Control Garden Symphylans Infesting Strawberries

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Lorsban-4E before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Lorsban-4E according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban-4E.

Directions for Use

Use and Dosage Recommendations

Apply Lorsban*-4E insecticide as a preplant broadcast spray to the soil surface at a rate of 2 quarts per acre using power operated ground equipment. On the same day of treatment, incorporate the insecticide into the top 2 to 4 inches of soil using a disc, field cultivator, or equivalent equipment. Do not tank mix Lorsban-4E with other pesticides, surfactants, or fertilizer formulations unless prior use has shown the combination to be noninjurious under local conditions. Consult your cooperative agricultural extension service for additional information concerning garden symphylan control practices in your area.

Chemigation: For uses described in this supplemental labeling, do not apply through any type of irrigation system.

Restriction: Apply only as a preplant soil incorporated treatment in the spring for protection of strawberries during the following year.
